Profile

PhD candidate in Economics at McGill University (thesis submitted May 2026), working at the intersection of labour economics and macroeconomics. My research combines Canadian administrative microdata with structural macroeconomic models to study labour market power, the distributional effects of macroeconomic shocks, and the monetary and fiscal policy responses designed to mitigate them. Extensive experience with confidential Statistics Canada microdata. Fully bilingual in French and English.

Fields

Primary: Labour Economics
Secondary: Macroeconomics (monetary and fiscal policy)

Education

- **McGill University** — Montreal, QC, Canada
  PhD in Economics (thesis submitted May 2026) — *2018 – present*
  - *Thesis: Three Essays in Labour Market Power. Advised by Fabian Lange and Markus Poschke.*

- **Université de Montréal** — Montreal, QC, Canada
  M.Sc. in Economics — *2016 – 2018*
  - *Thesis on Bayesian state-space estimation of macroeconomic latent states. Supervised by William McCausland and Immo Schott.*

Job Market Paper

- **Labour Market Power in Canada: Long-Term Trends and Cyclical Dynamics** [Paper]
  This paper provides the first time-series analysis of labour market concentration in Canada. National concentration gradually declined from 2001 to 2019, while local concentration rose temporarily by 14% during the Great Recession. The long-run decline reflects two offsetting forces: increased within-industry competition and wage-bill shifts toward more concentrated sectors. During the Great Recession, 68% of the increase in local concentration was due to sectoral reallocation. A calibrated TANK model with employer market power shows that fiscal expansions compress wage markdowns, boost the labour share, and markedly reduce consumption and income inequality between workers and capitalists.

Submitted Papers

- **Phillips Curve Flattening Mechanically Weakens NAIRU Identification**
  In the standard random-walk state-space model, the likelihood information about an interior NAIRU state relative to the smoothness precision supplied by the state equation is proportional to the squared Phillips curve slope. Canadian quarterly data from 1977 to 2026 show the mechanism is

quantitatively severe: across the February 1991 inflation-targeting break this ratio falls by a factor of twenty-three, driven almost entirely by the slope. The credible interval for the unemployment gap then contains zero in 97 per cent of quarters, against 73 per cent before, and without a sign restriction the posterior probability of a negative slope falls from 0.99 to 0.78.

Working Papers

- **The Insurance Value of a Monetary Union: Sovereign Debt and Reserve Pooling**
- **Immigration, Labour Dynamics, and Fiscal Sustainability** (with F. Diabagate) [Paper]
- **The Trajectory of Immigrants' Exposure to Labour Market Power in Canada** (with Y. Diallo) — *CLEF Working Paper, Canadian Labour Economics Forum* [Paper]
- **Import Penetration of Low Quality Products: Markup Implications** — *MPRA Paper No. 114611* [Paper]

Applied Policy Work

- **Country Climate Diagnostic Report – Côte d'Ivoire** (World Bank, 2023), co-authored pages 209–216. Climate finance diagnostics, fiscal policy modelling and green growth scenario analysis. [PDF]

Professional Experience

- **Researcher (Chercheur) — CIREQ** Montreal, QC, Canada
  Centre interuniversitaire de recherche en économie quantitative, McGill University *2018 – present*
  - Research in labour and macroeconomics: labour market concentration and employer power, Bayesian state-space estimation of latent macroeconomic states, and structural modelling of fiscal policy.
  - Build and maintain large-scale estimation pipelines on confidential administrative microdata within Statistics Canada RDC/CIQSS environments, under disclosure and reproducibility requirements.
- **Climate Economics Consultant — World Bank Group** Montreal, QC, Canada
  Country Climate and Development Reports (CCDRs) *Feb 2023 – Jun 2024*
  - Conducted climate finance diagnostics and contributed to macro-fiscal policy modelling and green growth scenario analysis for a published country report.

Teaching Experience

- **Teaching Assistant: Microeconomic Theory** Montreal, QC, Canada
  McGill University *January 2025 – April 2025*
- **Teaching Assistant: Macroeconomic Policy** Montreal, QC, Canada
  McGill University *September 2018 – April 2020*
- **Teaching Assistant: International Trade** Montreal, QC, Canada
  McGill University *Winter 2018*
- **Teaching Assistant: Principles of Economics, Microeconomics** Montreal, QC, Canada
  Université de Montréal *September 2016 – April 2020*

Conferences and Seminars

- CEA Annual Conference, Montreal – May 2025
- Emerging Excellence Conference (CIQSS), Montreal – May 2025
- Institutions and Regional Development Conference, Naples – Sep 2024
- World Bank Group Africa Chief Economist Seminar – Jun 2024
- CIREQ Conference, McGill – 2023, 2024
- Labour Group Seminar, McGill – 2024
- Applied Breakfast Seminar Series, McGill – 2022–2024
- GREDI/CREATE/CIREQ PhD Workshop, Sherbrooke – Sep 2019

Skills

- **Methods:** Bayesian estimation and MCMC (Gibbs sampling, state-space methods), DSGE/TANK models, time-series and panel econometrics, administrative microdata
- **Software:** Stata, R, Python, MATLAB, Dynare, E-Views, SPAD, LaTeX
- **Languages:** French (Native), English (Fluent)

Fellowships and Awards

- **2024** Great Travel Award
- **2023** Statistics Canada CIQSS Award
- **September 2021** McCall MacBain Award, McGill University
- **March 2021** Max Stern Award, McGill University
- **2021** I246437C0G – Bank of Canada
- **2021** Professor Fabian Lange Graduate Award
- **2020–2021** Social Sciences and Humanities Research Council of Canada
- **2020–2021** Fonds de recherche du Québec – Société et culture (FRQSC)
- **January 2020–Summer 2021** Tuition Fee-Waiver Award, Government of Côte d'Ivoire
- **2018–2023** PhD Fellowship, McGill University
- **2018** Award, International Affairs, Université de Montréal
- **2018** Bernard Landry Award, Université de Montréal
- **2016–2018** Tuition Fee-Waiver Scholarship, School of Graduate Studies, Université de Montréal
